

**WEST TEXAS CHAPTER
AGC, INC.**

Workforce Effort – Member Response

West Texas AGC works with numerous schools both secondary high schools, technical trade schools, and higher learning offering certificates, associate and even bachelor's degrees. It is important and critical to step up our efforts, in this chapter and as a commercial construction industry, to connect with the schools, influence the curriculum, and mentor the students in order to encourage more young people to enter the construction industry.

Where do West Texas AGC member's start to alter the course of the workforce crisis?

Return the attached interest form to be included in the chapter efforts to work with schools and students through-out the chapter territory.

Name of Company: _____

Contact Person: _____ **Phone:** _____

Email Contact: _____
