Safety Tip: October is Fire Prevention Month

About Fire Prevention Week

Since 1922, the NFPA has sponsored the public observance of Fire Prevention Week.

Fire Prevention Week is observed each year during the week of October 9th in commemoration of the Great Chicago Fire, which began on October 8, 1871, and caused devastating damage. This horrific conflagration killed more than 250 people, left 100,000 homeless, destroyed more than 17,400 structures, and burned more than 2,000 acres of land.

There are many sources on a construction site to ignite a fire. it may be stored chemicals, piles of construction debris, stored materials or faulty temporary electrical wiring. No matter the source, each job site is to be protected with the appropriate size and type of "Fire Extinguisher" to quickly contain and control a flame/fire. Use today's Toolbox Talk to learn more about the correct FE for your construction projects and share this information with employees.

Check your job sites this week and tags on Fire Extinguishers to verify they are charged and ready to use. Do your employees know where to find the FE?
