

AGC

WEST TEXAS CHAPTER
THE CONSTRUCTION ASSOCIATION

PLAN ROOM SERVICES

Our internet plan room is managed by West Texas AGC staff and powered by cProject.

Our service provides West Texas AGC members **immediate** notification of projects as they are posted to review and/or download.

Projects are monitored and maintained with up to the date addenda, memos, bidders, and other important changes for each project.

The Internet Plan Room for General Contractors, Sub-contractor and Supplier Members with West Texas AGC, is made possible through our partnership with cProject. On line access is available to your office, home or mobile device. Plans, specifications, addenda, bidders list or project contact information is available for each project. By viewing projects in the chapter territory and beyond, parts of New Mexico and Oklahoma, you can market opportunities in areas beyond your own city, manage your sales force due to geographic locations, or consider how to manage prospects. We are working to assist you in expanding your networks and partners—providing opportunities while saving you time and money.

An ESSENTIAL SERVICE to the profitability of our members is a versatile plan room service. There are three plan room offices in the West Texas Chapter located in Abilene, Midland, and Wichita Falls. Each office is staffed full time to answer your questions about projects, and the many chapter services. Offices may be utilized by members to review plans from a member access computer and to perform take offs while in the offices. Offices are equipped with office supplies and capabilities to print plans for your personal use on the wide format printers, standard copiers or flash drives for further reference and access.

The West Texas AGC staff actively and diligently pursue project leads and opportunities. New projects, addenda and down to the wire notices about projects are posted on line and then emailed to our members in an ITB format and Daily Update. We work cooperatively with architects, engineers, and multiple private and public entities, providing our members access to numerous AGC Chapter partner's projects on cProject.

Whether you are looking for projects in your local area or want to expand viewing all the areas covered by West Texas AGC and use the technology options available, we can provide the services you need. Contact us today.
